Professional Summary

Frontend React Developer with around 2 years of experience building production-ready web applications using React.js, Next.js, and TypeScript. Skilled in Redux Toolkit, REST API integration, JWT authentication, SSR/SSG, performance optimization, and deployment workflows. Adept at responsive UI development, component-driven architecture, and consistent UI across browsers.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, Tailwind CSS

Competencies: React Hooks (useState, useEffect, useMemo), REST API Integration, JWT Authentication, SSR/SSG, Performance Optimization, Responsive Design, Jest

Tools: Git, GitHub, VS Code, Chrome DevTools, Postman

Work Experience

Frontend React Developer – Piccosoft Software Labs India Pvt. Ltd.

Nov 2024 – Present

Chennai, Tamil Nadu

- Drove frontend delivery of a B2C e-commerce platform using React.js and Next.js, completing all planned features on schedule.
- Extracted 20+ reusable React components into a shared library, reducing feature delivery time by ~30% and improving codebase consistency.
- Integrated 15+ REST API endpoints; implemented JWT authentication and role-based access control for secure route management.
- Applied Next.js SSR/SSG and lazy loading to optimize page load speed, reducing load time by 57% and boosting SEO rankings.
- Identified and resolved 40+ layout defects across mobile, tablet, and desktop using Chrome DevTools.

Trainee React Developer

Aug 2024 – Nov 2024

- Trained in React.js and Next.js through hands-on tasks, building component-based UIs with React Hooks and client-side routing.
- Practiced REST API integration, state management with Redux Toolkit, and responsive layout development using Tailwind CSS.
- Contributed to UI component reviews and implemented feedback-driven improvements to improve code quality.

Projects

B2C E-Commerce Platform (Seller & Store Panel)

Nov 2024 – Apr 2025

- Built a multi-vendor marketplace enabling sellers to register with KYC approval, manage product variants, track orders, run promotions, and monitor earnings — while customers browse, compare, checkout with multiple payment options, and track deliveries in real time.
- Optimized performance using Next.js SSR/SSG, lazy loading, and code splitting — reducing page load time by 57% and bundle size by 25%, improving SEO rankings and user retention.
- **Tools Used:** Next.js, React.js, JavaScript, TypeScript, HTML5, Tailwind CSS, Redux Toolkit, REST API, JWT

Blockchain-Powered Food Traceability Marketplace

May 2025 – Apr 2026

- Developed the public-facing website for a global food traceability marketplace connecting international food buyers with verified agri suppliers — enabling complete product traceability from farm to delivery.
- Built a responsive, SEO-optimized website using Next.js with REST API integration for dynamic supplier and product data, managed via Redux Toolkit global state.
- **Tools Used:** Next.js, React.js, TypeScript, HTML5, Tailwind CSS, Redux Toolkit, REST API

Education & Certifications

Master of Mathematics

Jun 2021 – May 2023

Khadir Mohideen College, Bharathidhasan University – Thanjavur, Tamil Nadu

Java Full Stack Developer Training – QSpiders

Jul 2023 – Apr 2024

Covered: Core Java, JDBC, Spring Boot, Hibernate, HTML, CSS, JavaScript, React.js, SQL
